

## Houston SCCA Solo Committee meeting minutes 07June2016

### **Tech Report:**

- Gulf Greyhound no issues reported.

### **Fastrack:**

- Reruns are granted for timing failure, object on course, red flag, or issues at the discretion of the Chief Steward. Reruns are not allowed for failure of the competitor's car. A minimum of 5 minutes before they get a rerun.
- Proposed rule change: STS can use non-OEM LSD.
- 2016 Cadillac ATS-V in BS
- Cadillac ATS 2.0 (2012-16) in STU

### **Treasurer:**

- April 152 drivers.
- May Sunday event of 120 without DBs (Mother's day).

### **Last Month Practice:**

- May practice sold out almost instantly
- 3 no shows and a few walk ups that showed up to take their place
- Plan to have another practice in August at HPA.
- A high speed spin on an ND Miata hit the timing light and bent his door pretty bad. This broke the timing light transmitter and we will see if Race America can fix it.
- Guy in an SUV started driving through the course while we were setting up. He said he was teaching his son to drive. We put up the yellow ropes to keep cars from wandering in.

### **Last Month Event:**

- Raymond was subbing for Daniel.
- We had to move the course to avoid digging a hole. Then we restarted the event and gave everyone reruns. Officially we do not have to get reruns for course conditions. 22 reruns.
- Scott and the Beards pointed out that the cone near the Greyhound sign was in the wrong spot. We took 20 minutes to straighten it out. Next time the desired goal is to keep the cars running. We should not put turns on top of those patches.
- We had issues with the antenna pole that we attach to the truck. We attempted to fix it between heats.
- The site manager came over and refused to sign the waiver. He wanted the event site payment that day. We did not bring checks with us.
- A corner threw a red flag when they should not have. We will try to teach the corner captains.
- We started at 9:30 on time until we decided to restart due to the pavement.
- We did not have flour. We sent someone to get flour but they brought back ice instead. On the plus side we had plenty of ice.

### **Next event**

- We will be at GSS, they have an event scheduled for Saturday so we can't start setup until 5:30. Not sure if there are any flooding issues. Plan is to show up at 5:00 for setup.
- No cap on the event. We had a lot of walkups last time we were at GSS.
- We will invite the barbecue truck. If they can't make it we may decide to have a lunch break if the turnout is low.
- We have the insurance paperwork.
- Trash bags. They only have 2 porta potties at the site. We will not order more.
- RoHo will bring his car.

**Timing Computer**

- No decision to buy backup computer yet.

**Misc.**

- Mark Gifford wants us to have a class called CAM 220 that will have >220 tread wear rating. It does not have to be a trophy class.
